

For its Group Research & Development located in Olen (Belgium), Umicore is currently looking for a

Project Leader Environmental Technologies

We are looking for a Project Leader with background or interest in environmental technologies. You take the responsibility of research projects, broaden your expertise and make it available within other R&D projects. You push boundaries by acquiring knowledge on new technologies and applying this knowledge to generate ideas for new developments. Moreover, you maintain your internal network and share expertise with colleagues.

RESPONSIBILITIES

- Your main responsibility is the development and optimization of environmental processes and technologies
- You continue to develop your own, as well as the group's, expertise in upcoming opportunities
- You prepare the tasks you have been entrusted with and lead their implementation
- You are accountable for the results, timing and budget in the area of your responsibility
- You take care of the communication with internal and external customers and stakeholders

PROFILE

- You hold a PhD degree in chemistry, bio-engineering or chemical engineering and you are driven by scientific and technological challenges
- You are fluent in English and Dutch or you are prepared to master it rapidly
- Knowledge of French and / or German and / or other languages are clear assets
- You are prepared to accomplish missions abroad
- You are result-oriented and your passion for your work proves infectious; as such, you succeed in convincing other people to apply the results of research and development work
- Teamwork and open communication are very important to you
- You have a curious nature meaning that you like exploring and learning new things
- You are open minded towards new ideas and concepts
- You stimulate your own and others' creativity and innovation

OFFER

Umicore promotes continuous learning for all its employees and foresees the adequate training and education in order to guarantee a fast and comfortable integration. On top of competitive working conditions, Umicore's wide range of activities provides an excellent platform for growth and job rotation.
